Operating Instructions
wireSENSOR, WDS Series

WDS-40-MT19-P
WDS-80-MT33-P
WDS-130-MT56-P
Declaration of Incorporation

Declaration of incorporation according to the EC Machinery Directive 2006/42/EC, Annex II B

The manufacturer and person authorized to compile the relevant technical documents

MICRO-EPSILON MESSTECHNIK
GmbH & Co. KG
Königbacher Straße 15
94496 Ortenburg / Germany

hereby declare that the machine designated below complies with the relevant fundamental health and safety requirements of the EC Machinery Directive, including modifications to it applicable at the time of this declaration, based on its design and construction and in the version put on the market by us – to the extent that the scope of supply allows.

Machine design: Draw-wire sensor (mechanics and models with potentiometer output)
Type designation: WDS-xxx, WPS-xxx

The following fundamental health and safety requirements according to Annex I of the directive specified above have been applied and complied with:
- No. 1.1.2. Principles of safety integration
- No. 1.7.3. Marking of machinery
- No. 1.7.4. Operating instructions
Furthermore, we declare compliance with the following directives and standards including the modifications applicable at the time this declaration is made:
- Directive 2006/42/EC (machinery)
  - EN ISO 13857:2019 Safety of machinery - Safety distances to prevent hazard zones being reached by upper and lower limbs
  - EN 60204-1:2018 Safety of machinery - Electrical equipment of machines - Part 1: General requirements
- Directive 2011/65/EU (RoHS)
  - EN IEC 63000:2018 Technical documentation for the assessment of electrical and electronic devices with respect to the restriction of hazardous substances

We also declare that the special technical documentation for this partially completed machine has been created in accordance with Annex VII, Part B, and commit ourselves to disclose this to the market surveillance authorities upon request. The commissioning of these partially completed machines is prohibited until the partially completed machine(s) has/have been installed in a machine that meets the requirements of the EC Machinery Directive and for which an EU Declaration of Conformity according to Annex II, Part A exists.

Ortenburg, Germany    Dipl.-Ing.(FH) Eduard Huber, MBA
July 1, 2021     Quality Manager

wireSENSOR, WDS series
1. Safety

System operation assumes knowledge of the operating instructions.

1.1 Symbols Used

The following symbols are used in these operating instructions:

- **CAUTION** Indicates a hazardous situation which, if not avoided, may result in minor or moderate injury.

- **NOTICE** Indicates a situation that may result in property damage if not avoided.

- Indicates a user action.

- Indicates a tip for users.

1.2 Warnings

- **CAUTION** Do not open the sensor housing.
  - Risk of injury due to pre-tensioned spring motor

- Do not let the measuring wire snap.
  - Risk of injury due to whiplash of the wire with mounting bolts/hooks
  - Destruction of the wire and/or the sensor

- Do not pull or loop the measuring wire around unprotected body parts.
  - Risk of injury

- Connect the power supply according to the safety regulations for electrical equipment.
  - Risk of injury
  - Damage to or destruction of the sensor

- Do not pull out the measuring wire beyond the measuring range listed.
  - Risk of injury
  - Destruction of the measuring wire and/or the sensor
The supply voltage must not exceed the specified limits
> Damage to or destruction of the sensor

Avoid shocks and impacts to the sensor.
> Damage to or destruction of the sensor

### 1.3 Notes on CE Marking

For WDS draw-wire displacement sensors with potentiometer output, the directives 2006/42/EC and 2011/65/EU shall apply.

Draw-wire displacement sensors with potentiometer output are devices (components) which cannot be operated autonomously and do not carry a CE mark. Therefore, an EU Declaration of Conformity is not issued according to EMC law and the Machinery Directive. The Declaration of Incorporation shall apply.

### 1.4 Intended Use

- Draw-wire displacement sensors are used for test applications during crash tests, for simulators and in test benches.
- The sensor must only be operated within the limits specified in the technical data, see 2.3.
- The sensor must be used only in such a way that no persons are endangered or machines and other material goods are damaged in the event of malfunction or total failure of the sensor.
- Take additional precautions for safety and damage prevention in case of safety-related applications.

### 1.5 Proper Environment

- Protection class: IP50
- Temperature range:
  - Operation: -40 ... +85 °C (-40 ... +185 °F)
  - Storage: -40 ... +85 °C (-40 ... +185 °F)
- Humidity: 5 ... 95 % (non-condensing)
- Ambient pressure: Atmospheric pressure
- Vibration: According to DIN EN 60068-2-6
- Shock: According to DIN EN 60068-2-27
1.6 Foreseeable Misuse

Do not pull out the measuring wire beyond the measuring range listed. This causes the wire to break and thus uncontrolled snapping of the measuring wire. Risk of injury.

Do not have sensor held by a second person while the measuring wire is pulled out. Risk of snapping and thus injury.
2. Functional Principle, Technical Data

2.1 Measuring Principle

The draw-wire principle transforms a linear movement into a change in resistance.

A measuring wire made of highly flexible stainless-steel cores is wound onto a drum by using a durable spring motor.

The winding drum is coupled axially with a potentiometer made of conductive plastic.

![Fig. 1 Draw-wire displacement sensor with potentiometer](image)

2.2 Structure

The draw-wire principle is applied in housing designs 40-MT, 80-MT and 130-MT with different measuring ranges from 40 to 130 mm.

The electrical connection is the potentiometer output (resistance divider).

FSO = Full Scale Output
3. Delivery

3.1 Unpacking/Included in Delivery

1 Sensor
1 Assembly instructions

➤ Do not remove draw-wire displacement sensors from packaging using the wire or eyelet.
➤ Transport them in such a way that they cannot be damaged.
➤ Check the delivery for completeness and shipping damage immediately after unpacking.
➤ If there is damage or parts are missing, immediately contact the manufacturer or your supplier.

The transport lock of the measuring wire must only be removed immediately prior to installation and only by technical staff.

Optional accessories are listed in the appendix, see A 1.

3.2 Storage

⚠️ CAUTION
Store sensors solely with the transport lock installed. This prevents the measuring wire from ever being pulled out and unintentional snapping.
> Risk of injury due to whiplash of the wire with eyelet

Temperature range for storage: -40 ... +85 °C (-40 ... +185 °F)
Humidity: 5 ... 95 % (non-condensing)
Atmospheric pressure
4. Installation and Assembly

4.1 Precautions
Do not pull out the measuring wire beyond the measuring range listed.
> Damage to or destruction of the sensor

Do not damage the measuring wire.
Do not oil or grease the measuring wire.
Do not kink the measuring wire.
Do not pull the measuring wire diagonally.
Do not let the measuring wire drag around objects.
Attach the measuring wire to the measured object while the wire is retracted.
Do not wrap the measuring wire around body parts.

⚠️ CAUTION
Free return of measuring wire not permitted!
> Risk of injury due to whiplash of the wire with eyelet.

> Destruction of the wire and/or the sensor.

Secure the measuring wire during installation work.
4.2 Sensor Mounting

Install the sensor according to the information in the table below:

<table>
<thead>
<tr>
<th>Model</th>
<th>Screws for through-hole</th>
<th>Threaded holes (on sides)</th>
</tr>
</thead>
<tbody>
<tr>
<td>WDS-40-MT19-P</td>
<td>2 x M2</td>
<td></td>
</tr>
<tr>
<td>WDS-80-MT33-P</td>
<td>2 x M3</td>
<td>8 x M2.5; depth 5 mm</td>
</tr>
<tr>
<td>WDS-130-MT56-P</td>
<td>2 x M4</td>
<td>8 x M3; depth 6 mm</td>
</tr>
</tbody>
</table>

The sensor does not have to be oriented in a special way.

Select the installation position in such a way that damage to or contamination of the measuring wire is avoided.

- If possible, prefer an installation position in which the measuring wire exits downward. This prevents liquids from entering the measuring wire outlet.

- Do not let the measuring wire snap! There is no liability for material defects in case of damage due to snapping.

*Fig. 2 Horizontal installation via through-holes*

*Fig. 3 Vertical installation via threaded side holes*
Combined installation is only possible for sensors WDS-80-MT33-P and WDS-130-MT56-P.

Additional installation options, see Fig. 4, are available in the appendix under Accessories, Mounting Bracket Set, see A 1.2.
Installation and Assembly

**CAUTION**

If a measuring wire is stretched in the area where operating personnel is located, injuries may occur.

**NOTICE**

Do not twist the measuring wire!

4.3 Dimensional Drawings

![Dimensional Drawing WDS-40-MT19-P](image)

Fig. 5 Dimensional drawing WDS-40-MT19-P, dimensions in mm (inches)

- Cable outlet, see 4.4
- Length of integrated cable: 6 cm (2.36 inches)
- Cable diameter: Ø 1.2 mm (dia. 0.047 inches)
- Cross-sectional area of wires: 0.04 mm² (AWG 31)
**CAUTION**

If a measuring wire is stretched in the area where operating personnel is located, injuries may occur.

**NOTICE**

Do not twist the measuring wire!

---

*Fig. 6 Dimensional drawing WDS-80-MT33-P, dimensions in mm (inches)*

</tr>
</tbody>
</table>
### 4.5 Guiding and Attaching the Wire

If the measuring wire must be pulled out of the sensor to guide the wire or attach it to the measured object:
- the sensor must not be held by a second person during that process,
- the measuring wire must not be pulled out beyond the measuring range listed,
- the area around the sensor must be protected against snapping of the measuring wire.

**Incorrect**

Fix the measuring wire to the target using an eyelet.

Guide the measuring wire vertically out of the sensor housing.

Diagonal pull is only permitted up to 3 degrees.

If you drag the measuring wire over the insertion hole or other objects, the measuring wire will be damaged and/or tear.

**Correct**

Guide the measuring wire in a protected area so that it cannot get caught or otherwise be damaged.

![Fig. 9 Attachment and maximum diagonal pull of measuring wire](image)

- Wire outlet $0^\circ$
- $\pm 3^\circ$ tolerancy
- max. $3^\circ$
For optimal wire guidance, the eyelet at the end of the measuring wire must move freely. Therefore, do not bolt the eyelet, e.g., with a screw or rivet.

Fig. 10 Free-running eyelet
### 4.6 Potentiometer Output

Draw-wire displacement sensors with potentiometer output are connected according to the table, see Fig. 11.

<table>
<thead>
<tr>
<th>Input voltage</th>

</tr>
<tr>
<td>Pin assignment</td>
<td>Input+ Red Brown</td>
<td>Ground Black Orange</td>
<td>Signal Yellow Red</td>
</tr>
</tbody>
</table>

*Fig. 11 Table of potentiometer output*

Use any potentiometer only when switched to voltage divider. Using it as a variable resistor destroys the component. Observe maximum contact currents.

- Use potentiometers only as voltage dividers, not as variable series resistors!

### 5. Operation

There are no adjustment and setting elements for draw-wire displacement sensors with potentiometer output.
6. Operation and Maintenance

The measuring wire, wire drum, spring motor and potentiometer must not be greased or oiled.

Notes about how to guide the wire, see 4.5, must be observed during operation.

Imperfect guiding of the wire can cause increased wear and early failure.

If third parties intervene, the claim for liability for material defects becomes void. MICRO-EPSILON is exclusively responsible for repairs, see 8.

7. Disclaimer

All components of the device have been checked and tested for functionality in the factory. However, should any defects occur despite careful quality control, these shall be reported immediately to MICRO-EPSILON or to your distributor / retailer.

MICRO-EPSILON undertakes no liability whatsoever for damage, loss or costs caused by or related in any way to the product, in particular consequential damage, e.g., due to
- non-observance of these instructions/this manual,
- improper use or improper handling (in particular due to improper installation, commissioning, operation and maintenance) of the product,
- repairs or modifications by third parties,
- the use of force or other handling by unqualified persons.

This limitation of liability also applies to defects resulting from normal wear and tear (e.g., to wearing parts) and in the event of non-compliance with the specified maintenance intervals (if applicable).

MICRO-EPSILON is exclusively responsible for repairs. It is not permitted to make unauthorized structural and / or technical modifications or alterations to the product. In the interest of further development, MICRO-EPSILON reserves the right to modify the design.

In addition, the General Terms of Business of MICRO-EPSILON shall apply, which can be accessed under Legal details | Micro-Epsilon https://www.micro-epsilon.com/impressum/.

For translations into other languages, the German version shall prevail.
8. **Service, Repair**

In the event of a defect in the sensor, please send in the affected parts for repair or replacement. If the cause of a fault cannot be clearly identified, please send the entire measuring system to:

MICRO-EPSILON MESSTECHNIK GmbH & Co. KG
Koenigbacher Str. 15
94496 Ortenburg / Germany

Tel. +49 (0) 8542 / 168-0
Fax +49 (0) 8542 / 168-90
info@micro-epsilon.com
www.micro-epsilon.com
9. Decommissioning, Disposal

In order to avoid the release of environmentally harmful substances and to ensure the reuse of valuable raw materials, we draw your attention to the following regulations and obligations:
- Remove all cables from the sensor and/or controller.
- Dispose of the sensor and/or the controller, its components and accessories, as well as the packaging materials in compliance with the applicable country-specific waste treatment and disposal regulations of the region of use.
- You are obliged to comply with all relevant national laws and regulations.

For Germany / the EU, the following (disposal) instructions apply in particular:

- Waste equipment marked with a crossed garbage can must not be disposed of with normal industrial waste (e.g. residual waste can or the yellow recycling bin) and must be disposed of separately. This avoids hazards to the environment due to incorrect disposal and ensures proper recycling of the old appliances.

- A list of national laws and contacts in the EU member states can be found at https://ec.europa.eu/environment/topics/waste-and-recycling/waste-electrical-and-electronic-equipment-wEEE_en. Here you can inform yourself about the respective national collection and return points.

- Old devices can also be returned for disposal to MICRO-EPSILON at the address given in the imprint at https://www.micro-epsilon.de/impressum/.

- We would like to point out that you are responsible for deleting the measurement-specific and personal data on the old devices to be disposed of.

- Under the registration number WEEE-Reg.-Nr. DE28605721, we are registered at the foundation Elektro-Altgeräte Register, Nordostpark 72, 90411 Nuremberg, as a manufacturer of electrical and/or electronic equipment.

A 1.1 Wire Extension

Fig. 12 Wire extension WE-xxxx-CLIP, dimensions in mm (inches)
A 1.2 Mounting Bracket Set

The mounting bracket set provides you with various installation options, see Fig. 13, see Fig. 14, see Fig. 17.

*Fig. 13 Vertical installation with the wire outlet at a 45° angle*

*Fig. 14 Horizontal installation with the wire outlet at an infinitely variable angle*
If the device is installed with the wire outlet at an infinitely variable angle, mounting the sensor with only one screw and then rotating it around that screw may be sufficient, if the basic conditions are suitable for such an installation.
