FSO = Full Scale Output CSH Sensors are matched to controller with standard cable length

¹⁾ Valid with reference controller, relates to standard measuring range

²⁾ RMS value of the signal noise

³⁾ Non condensing

⁴⁾ Without cable, bend protection and crimp

⁵⁾ In the case of a sensor mounting 2 mm behind front surface

Mounting cylindrical sensors

All sensors can be installed as both freestanding and flush units.

The sensors can be clamped or fastened using a collet.

Mounting with set screw (plastic)

Mounting with collet

Important!

All Micro-Epsilon sensors are short circuit proof. Unlike other systems the pre-amplifier will not get damaged, if the front face of the sensor gets shorted by touching the conductive target.
