

More Precision

scanCONTROL // 2D/3D laser scanners (laser profile sensors)

- High resolution in x- and z-axis
- Profile frequency up to 10 kHz for monitoring of dynamic processes
- Innovative exposure control
- Available with patented Blue Laser Technology

Fast and precise 2D/3D profile measurements

The latest LLT30xx laser profile scanners provide calibrated 2D profile data with up to 5.5 million points per second. Enabling profile frequency of 10 kHz, the HIGHSPEED models are used for monitoring tasks in dynamic processes. The high-resolution sensor matrix with 2,048 points achieves a point distance of just 12 μm (LLT30xx-25).

Available with patented Blue Laser Technology

The scanCONTROL 30xx/BL laser profile scanners are equipped with a blue-violet laser diode. Particularly with semi-transparent measurement objects, the blue laser offers high signal stability.

The easy way of machine integration

The design of the LLT30xx series is compact and lightweight. The controller is integrated in the sensor itself, which simplifies mechanical integration. Numerous interfaces such as digital switch signals, Ethernet, PROFINET, EtherNet/IP or EtherCAT allow for measured data to be output directly.

Innovative exposure control to master difficult surfaces

On inhomogeneous or dark surfaces, the HDR (High Dynamic Range) data acquisition mode and the improved auto exposure optimizes the measurement results. In HDR mode, the rows of the sensor matrix are exposed differently but at the same time which avoids time offsets between the recordings. This is how moving objects can be detected reliably. The auto exposure feature enables to individually select the areas to be exposed.

Top performances with selectable operating modes

Choose from three predefined operating modes for your specific measurement task: "High-Resolution" for maximum precision, "High Dynamic Range" for optimal profile detection on difficult surfaces and "High Speed" for ultra-fast measurements.

Article designation

LLT30xx					

Laser options*

	/SI	Hardware switch-off of the laser line
	/3R	Increased laser power (class 3R, ≤ 30 mW), e.g., for dark surfaces
	/BL	Blue laser line (405 nm) for (semi-) transparent, red-hot glowing and organic materials

Cable output options*

	/PT	Cable directly out of the sensor ("Pigtail"), Length 0.3 m
	/VT	Cable directly out of the sensor ("Variable Tail") with a length of 0.6 or 1.0 m
	/ST	1 cable directly out of the sensor ("Single Tail"), multi-function port is omitted, with a length of 0.6 or 1.0 m

*Options can be combined

Model		LLT30xx-25	LLT30xx-25/BL	LLT 30xx-50	LLT 30xx-50/BL
Z-axis	Start of measuring range	77.5 mm		105 mm	
	Standard measuring range	Mid of measuring range		125 mm	
		End of measuring range		145 mm	
		Height of measuring range		40 mm	
	Linearity ¹⁾	(2 sigma) ±0.08 % FSO		±0.06 % FSO	
Reference resolution ^{2) 3)}	1.5 μm		3 μm
