

More Precision

scanCONTROL // 2D/3D Laser profile sensors

Powerful 2D/3D laser scanners

scanCONTROL 30x2

-  Precise profile measurements for industrial measurement tasks
-  Resolution x-axis: 1,024 points
-  Profile frequency up to 10,000 Hz
-  For small and large measurement areas
-  Also available with patented Blue Laser Technology
-  Compatible with **COGNEX® VisionPro**

Precise 2D/3D profile measurements

The new LLT30x2 laser profile scanners provide calibrated profile data with up to 7.9 million points per second. They allow profile frequencies up to 10 kHz and resolutions up to 1,024 points. Thanks to their high accuracy and versatility, the scanners are particularly suitable for static and dynamic applications as well as robotic applications. They measure and evaluate, e. g., angles, steps, gaps, distances, and circles.

Available as PROFILE and SMART versions

The scanCONTROL 30x2 series is available as PROFILE and SMART versions. PROFILE scanners provide calibrated profile data that can be further processed on a PC using software provided by the customer. With the 3DInspect software, the scanCONTROL sensors can also be used for 3D evaluations. SMART series scanners work independently and provide selected measurement values. The scanCONTROL 30x2 series supports all SMART functions and programs that are set in the scanCONTROL Configuration Tools software and directly stored in the internal controller.

Article designation

Laser options*

	/SI	Hardware switch-off of the laser line
	/3R	Increased laser power (class 3R) e.g., for dark surfaces
	/BL	Blue laser line (405 nm) for (semi-) transparent, red-hot glowing and organic materials (Measuring ranges 25 - 100 mm)

Cable outlet options*

	/RT	Cable outlet on the rear side ("Rear Tail") for space-saving installation, cable length 0.3 m. Sockets at cable end (Measuring ranges 25 - 200 mm)
	/PT	Cable directly out of the sensor ("Pigtail") Available lengths: 0.3 / 0.6 / 1.00 m

*Options can be combined

Accessories from page 39

The easy way of machine integration

The design of the LLT30x2 series is compact and lightweight. The controller is integrated in the sensor itself, which simplifies mechanical integration. The measurement data can be output directly.

Large measurement area up to 600 x 600 mm

The scanCONTROL 30x2 laser scanners are now also available with a large measuring field up to 600 x 600 mm. This allows large objects to be detected with high accuracy.

Application examples

Assembly monitoring of car body shell construction

Detection of the road surface profile

Geometry inspection in metals processing

Powerful 2D/3D laser scanners

Software for scanCONTROL SMART sensors

SMART

scanCONTROL Configuration Tools

Solution of complex 2D measurement tasks

- Can be used with all SMART sensors
- Sensor alignment and adjustment
- 16 measuring programs x 8 evaluations per parameter set
- 15 independent parameter packages can be stored in the sensor
- Data processing
- Logical operations for digital outputs
- Configuration of the measurement value transfer and the outputs

scanCONTROL Result Monitor

Visualization of measurement sequences

- For up to 4 scanCONTROL SMART sensors
- Display of profile and measured value history during operation
- Adjustable layout (different views, e.g. for workers)
- Parallel transmission of the measured values to the control unit is possible and recommended
- Logging and saving of profiles

scanCONTROL UDP Tool

Testing the UDP output of measured values

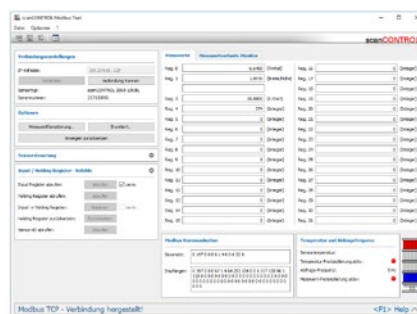

- For all scanCONTROL SMART sensors
- Logging possible up to 1,000 Hz
- Source code available

scanCONTROL Modbus Tool

Testing the Modbus communication

- For all scanCONTROL SMART sensors
- Transfer of measured data
- Sensor control via Modbus TCP
(load user modes, laser on/off, change exposure time, ...)

Integration of scanCONTROL sensors

SMART

PROFILE

Integration into customer software

- LLT.DLL and SDK for fast integration in /C++ or C# (NET) applications
- LabVIEW device driver
- Various example VIs (profile transmission, container mode, ...)
- Comprehensive documentation
- Linux integration
 - Based on GigE Vision/GenICam API
 - Fast integration via additional C++ library
 - Various sample programs
 - Comprehensive documentation
- Cognex VisionPro
 - AIK adapter for fast integration via Cognex AIK server
 - Cognex Range Images can be generated and processed based on the scanCONTROL measuring points
- Others on request

scanCONTROL Developer Tool

Complete integration example (demo tool)

- Source code available (QML / C++, usable for Windows and Linux)
- Serves as support for the development of own software with scanCONTROL sensors
- MouseOver over the sensor parameters directly displays the corresponding function in the LLT.DLL
- All data transmission options can be set and tested

Integration into image processing software

Easy integration due to GenICam/GigE Vision standard

- Direct connection to compatible 3D and image processing software possible
- Sensor is recognized by the standard and parameters are read out directly
- scanCONTROL 25/29xx: output in 2.5D
- scanCONTROL 30xx: output in Valid3D (corresponds to coord3D data formats)

Easy integration due to GigE Vision standard

- 3D comparisons and measurement
- Integration into various software solutions via GigE Vision possible
- Detection of fine surface defects
- OCR/text recognition independent of contrast
- Completeness, position detection, planarity, ... and much more!

GEN*i*CAM **GigE VISION**

Software 3DInspect

Intuitive user interface

Real 3D evaluation, not just 2.5D

Object extraction in 3D

Direct feedback with algorithms

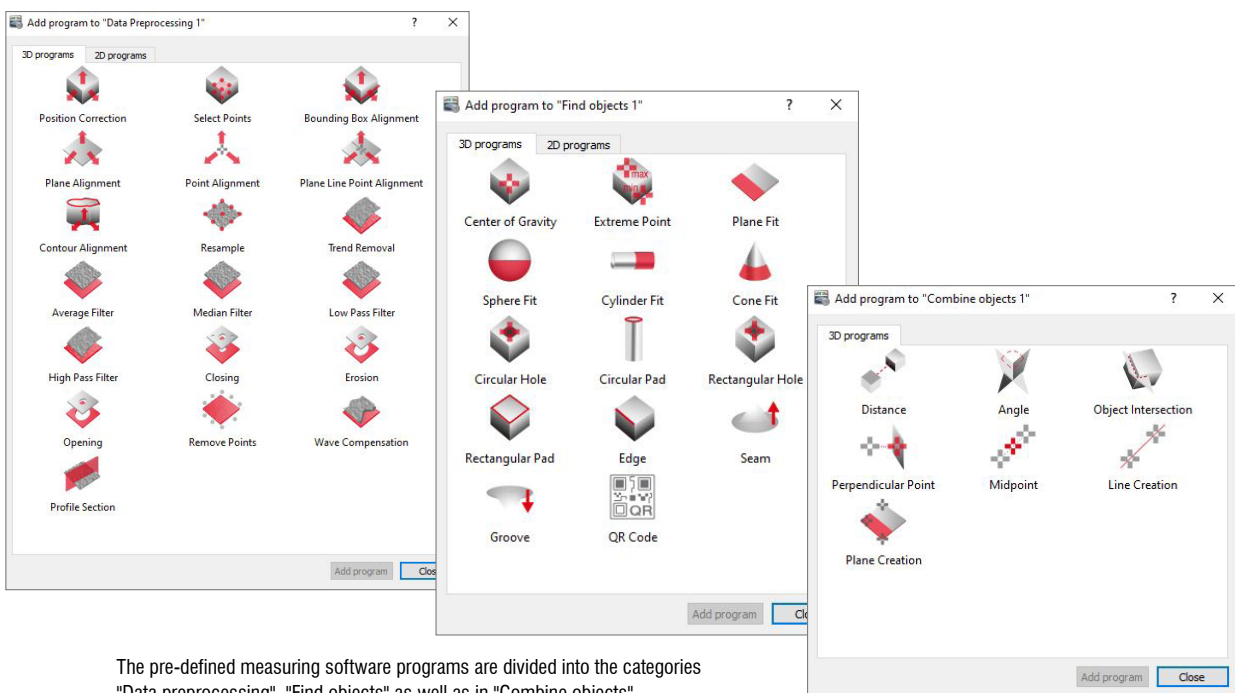

Compatible with all 3D sensors
from Micro-Epsilon

3DInspect

3DInspect software for 3D measurement and inspection tasks

The 3DInspect software is a powerful tool for sensor parameter set up and industrial measurement tasks. This software transmits the measurement data from the sensor via Ethernet and provides the data in three-dimensional form. The 3D data is then further processed on the PC using 3DInspect measurement programs, evaluated, assessed and, if necessary, logged and transmitted to a control unit via Ethernet. The 3D data can also be saved with the software. In addition to the scanCONTROL 30xx models, the 3DInspect software is also supported by the 3D Profile Unit and the surfaceCONTROL and reflectCONTROL sensors.

The pre-defined measuring software programs are divided into the categories "Data preprocessing", "Find objects" as well as in "Combine objects".

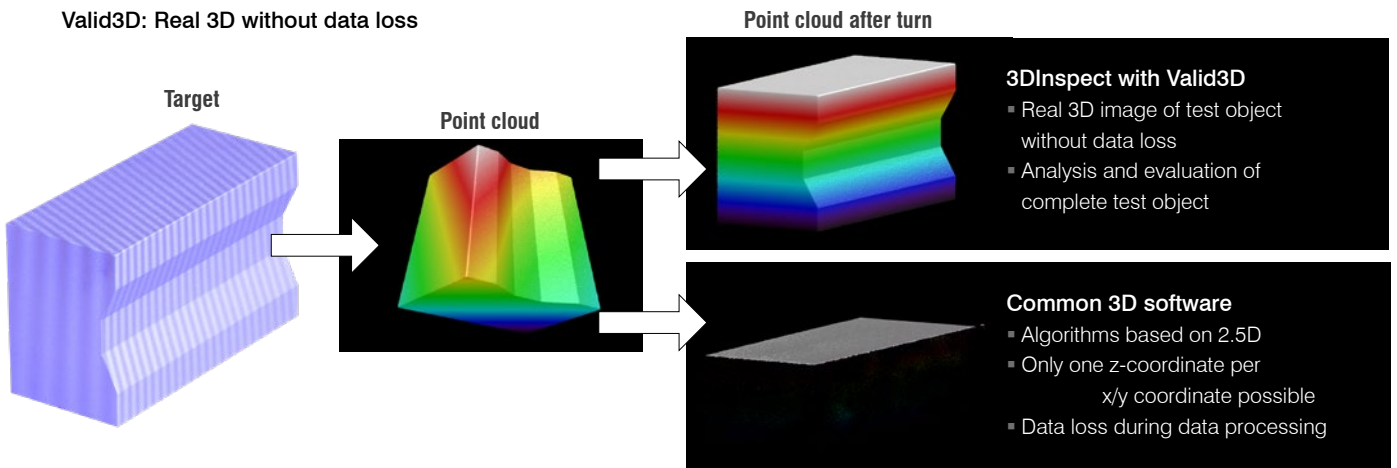

**Industrial Performance Unit:
Industrial PC with GigE Vision Sensors**

The Industrial Performance Unit is a powerful computing platform for 3D applications. The scanner can be parameterized directly via the 3DInspect software, allowing measurements to be started immediately. Results can be output via the integrated interfaces RPOFINET, EtherCAT and EtherNet/IP.

Valid3D technology from Micro-Epsilon vs. conventional 2.5D systems

The unique Valid3D technology enables lossless display and processing of the point clouds. This is how scanned 3D objects can be moved arbitrarily in the coordinate system.

System for multi-scanner applications

3D Profile Unit

micro-epsilon.com/3DPU

Profile stitching for up to 2 sensors

3D Profile Unit Controller

Powerful industrial computer

- Communication with any GigE Vision clients
- Direct integration into image processing software
- Transfer of profile data or 3D point clouds
- Data evaluation and system parameterization is implemented in the 3DInspect software
- Optionally available with Industrial Ethernet:
 - Integrated evaluation
 - Transfer of measured values to PLC
 - Industrial Ethernet interface for control and transfer of measured values

Width, thickness and Heavy Edge of battery film

Thickness of smartphone carrier plates

Stitched 3D point cloud of the smartphone carrier plate in 3DInspect

Accessories

scanCONTROL

2D/3D Gateway

PROFINET / EtherCAT / EtherNet/IP for all **SMART** scanners

One 2D/3D Gateway is connectable with up to 4 sensors. Operation of more than one sensor requires a switch. The 2D/3D Gateway communicates with the scanCONTROL SMART sensor via Ethernet Modbus. The resultant values are then converted to PROFINET,

EtherCAT or EtherNet/IP. The customer carries out the parameter setup with a detailed instruction manual. The gateway can also be parameterized in advance at the factory.

Models

6414142 2D/3D Gateway

Fieldbus coupler, configurable for PROFINET, EtherNet/IP and EtherCAT

6414142.001 2D/3D Gateway, pre-parameterized,

Pre-parameterized to customer log and IP addresses

Number of sensors on the gateway	Maximum measurement frequency
1	500 Hz
2	500 Hz
3	330 Hz
4	250 Hz

NEW

Higher measurement frequencies are also possible with the 30xx series due to the Modbus bundling option.

2D/3D Output Unit

Analog signals / digital switch signals for all **SMART** scanners

The 2D/3D Output Unit is addressed via Ethernet and outputs analog and digital signals. Different output terminals can be configured to the fieldbus coupler.

Models

6414073 2D/3D Output Unit Basic/ET

Fieldbus coupler with filter module and bus end terminal

0325131 OU-DigitalOut/8-channel/DC24V/0.5A/negative
