confocalDT // Confocal chromatic sensor system

Confocal chromatic hybrid sensors

confocalDT IFS2403

- Hybrid sensors ø8 mm with axial or radial beam path
- Submicron resolution
- For one-sided thickness measurements
- For precise distance measurements
- Small light spot

MR = Measuring range
SMR = Start of measuring range
Dimensions in mm, not to scale

| Model | | IFS2403-0.4 | IFS2403-1.5 | IFS2403-4 | IFS2403-10 |
|-------------------------------------|---------------------------|---|-------------|-----------|------------|

System design

confocalDT

Cable concepts for every application

The connection options are diverse and can be adapted to your plant or machine concept.

The confocalDT system consists of:

- Sensor IFS240x
- Controller IFC24xx
- Fiber optic cable C24xx

Customer-specific modifications

confocalDT

Customer-specific modifications

Application examples are often found where the standard versions of the sensors and the controllers are performing at their limits. To facilitate such special tasks, it is possible to customize the sensor design and to adjust the controller accordingly. Common requests for modifications include changes in design, mounting options, customized cable lengths and modified measuring ranges.

Possible modifications

- Sensors with connector
- Cable length
- Vacuum suitability up to UHV
- Specific lengths
- Customer-specific mounting options
- Optical filter for ambient light compensation
- Housing material
- Measuring range / Offset distance

Vacuum setup

Accessories

Mounting adapter

MA2402 for sensors 2402

Accessories: mounting adapter
MA2403 for sensors 2403

Accessories: mounting adapter
MA2404-12 for sensors IFS2404-2 / IFS2404/90-2 / IFS2407-0,1

Accessories: mounting adapter
MA2400 for sensors IFS2405 / IFS2406 / IFS2407 (consisting of a mounting block and a mounting ring)

Mounting block

Mounting ring

Accessories

Adjustable mounting adapters

JMA-xx mounting adapter
for distance measurements

JMA-Thickness mounting adapter
for two-sided thickness measurements

The adjustable JMA mounting adapter simplifies the alignment and fine adjustment of confocal sensors. The sensors are integrated and aligned directly in the machine together with the adapter. This corrects, e.g. minor deviations caused by mounting and compensates for tilted measuring objects. With two-sided thickness measurements, the JMA-Thickness mounting adapter supports the fine alignment of the two measuring points.

1 Max. shift in X ± 2 mm

2 Max. shift in Y ± 2 mm

3 Max. tilt angle in X $\pm 4^\circ$

4 Max. tilt angle in Y $\pm 4^\circ$

Adjustable mounting adapter JMA

Technical drawing of a rectangular plate with the following dimensions and features:

- Overall width: 200
- Overall height: 25
- Distance from left edge to first hole center: 30
- Distance between first and second hole centers: 80
- Distance from second hole center to third hole center: 100
- Distance from third hole center to right edge: 10
- Hole diameter: 12.5
- Two horizontal slots are located on the right side of the plate.
- Section line B-B is indicated at the top and bottom edges.
- Angle 1x45° is specified at the bottom right corner.

Accessories

Mounting adapter for individual sensors

Manual adjustment mechanism for easy and fast adjustment

Optimal sensor alignment for best possible measurement results

Ideally suitable for machine integration

Particularly for high resolution sensors with a small tilt angle, perpendicular installation is required. The JMA-xx mounting adapter enables fine alignment of the sensor to the target via the simple adjustment mechanism. This makes it easy to compensate for minor mounting deviations or tilted measuring objects.

Scope of supply

- 1 JMA-xx
- 1 sensor holder for smaller diameters (not with JMA-27)
- 1 hexagon screwdriver for positioning
- Assembly instructions

| Model | | JMA-08 | JMA-12 | JMA-20 | JMA-27 |
|------------------------------|---|---|--|---|---|
| Tilting range | X | $\pm 4^\circ$ (continuously adjustable) | | | |
| | Y | $\pm 4^\circ$ (continuously adjustable) | | | |
| Shifting range | X | ± 2 mm (continuously adjustable) | | | |
| | Y | ± 2 mm (continuously adjustable) | | | |
| Shock (DIN EN 60068-2-27) | | 15g / 6 ms in XYZ axis, 1000 shocks each | | | |

Application examples:

Alignment

Subsequent correction of the mounting position

Compensates for incorrect target position

Positioning

Shifting the sensor to target area

Accessories

Mounting adapter for two-sided thickness measurements

Optimal alignment of the optical axes enables high precision in two-sided thickness measurements

Pre-assembled for easy installation and fast commissioning

Ideally suitable for machine integration

For two-sided thickness measurements, the JMA-Thickness mounting adapter supports the alignment of the measuring points to one another. This means that the measuring points are arranged absolutely congruent to each other so that the sensors are positioned exactly on an optical axis. This prevents measurements at an offset and a reliable measurement result is achieved with the highest possible precision.

When delivered, the two mounting adapters are pre-mounted on a mounting plate and aligned with one another. This simplifies installation and the measuring system can be put into operation more quickly. After installation into the machine, the plate can be removed, if necessary.

Scope of supply

- 2 JMA-xx
- 1 JMP mounting plate
- 1 hexagon screwdriver 1.5 mm
- 1 Allen wrench 2.5 mm
- 1 Allen wrench 3.0 mm
- 1 Assembly instructions
- 2 optional reducing sleeves
(depending on the package and the corresponding sensor)

| Model | JMA-Thickness | -08 | -12 | -20 | -27 |
|------------------------------|---------------|---|---|---|---|
| Shock (DIN EN 60068-2-27) | | 15g / 6 ms in XYZ axis, 1000 shocks each | | | |
| Vibration (DIN EN 60068-2-6) | | 2g / 20 ... 500 Hz in XYZ axis, 10 cycles each | | | |
| Adjustment mechanism | | Screw setting mechanism via M3x0.25 screw with hexagon socket 1.5 | | | |
| Sensor mounting | | Radial clamping for ø 8 mm | Radial clamping for ø 12 mm | Radial clamping for ø 20 mm | Radial clamping for ø 27 mm |
| Compatibility | | confocalDT: IFS2403 series | confocalDT: IFS2404-2 IFS2407-0,1 | confocalDT: IFS2406-2,5/VAC interferoMETER: IMP-TH70 | confocalDT: IFS2405-0,3 IFS2405-1 IFS2406-3 IFS2406-10 IFD2411-x |

More precision with two-sided thickness measurements

Without JMA-Thickness:
Measurement error with tilted target

With JMA-Thickness:
Measures exactly at the opposite position

Without JMA-Thickness:
Incorrect thickness measurement with vibrations

With JMA-Thickness:
Sensors are on one optical axis –
provides stability even with vibrating objects

Without JMA-Thickness:
Sensors positioned incorrectly – no thickness measurement possible

With JMA-Thickness:
Optimal positioning support – object visible for both sensors

Optical fibers for IFS2407/90-0,3 sensors

C2407-x Optical fiber with DIN connector and E2000/APC (2 m, 5 m)

Vacuum feedthrough

- C2402/Vac/KF16 Vacuum feedthrough with optical fiber, 1 channel, vacuum side FC/APC non-vacuum side E2000/APC, clamping flange KF 16
- C2405/Vac/1/KF16 Vacuum feedthrough on both sides FC/APC socket, 1 channel, clamping flange type KF 16
- C2405/Vac/1/CF16 Vacuum feedthrough on both sides FC/APC socket, 1 channel, flange type CF 16
- C2405/Vac/6/CF63 Vacuum feedthrough FC/APC socket, 6 channels, flange type CF 63

Other accessories

- SC2471-x/USB/IND Connector cable IFC2461/71, 3 m, 10 m, 20 m
- SC2471-x/IF2008 Connector cable IFC2461/71-IF2008, 3 m, 10 m, 20 m
- PS2020 Power supply 24V / 2.5A
- EC2471-3/OE Encoder cable, 3m
- IF2030/PNET Interface module for PROFINET connection
- IF2030/ENETIP Interface module for EtherNet/IP connection

IF2001/USB converter RS422 to USB

The RS422/USB converter converts the digital signals of a confocal controller into a USB data packet. The sensor and the converter are connected via the RS422 interface of the converter. Data output is done via USB interface. The converter loops through further signals and functions such as laser on/off, switch signals and function output. The connected controllers and the converter can be programmed through software.

Special features

- Robust aluminum housing
- Easy sensor connection via screw terminals (plug and play)
- Conversion from RS422 to USB
- Supports baud rates from 9.6 kBaud to 12 MBaud

IF2004/USB: 4-channel converter from RS422 to USB

The RS422/USB converter is used for transforming digital signals of up to four confocal controllers into USB data signals. The converter has four trigger inputs and a trigger output for connecting additional converters. Data is output via an USB interface. The connected controllers and the converter can be programmed through software. The COM interfaces can be used individually and can be switched.

Special features

- 4x digital signals via RS422
- 4x trigger inputs, 1x trigger output
- Synchronous data acquisition
- Data output via USB

IF2008/ETH

IF2008/ETH Interface module for Ethernet connection with up to 8 sensors

The IF2008/ETH integrates up to eight sensors and/or encoders with an RS422 interface into an Ethernet network. Four programmable switching in-/outputs (TTL and HTL logic) are available.

10 indicator LEDs directly on the module show both the channel and the device status. In addition, acquisition and output of data via Ethernet is in addition performed at high speeds up to 200 kHz. Parameter setting of the interface module can be easily done via the web interface.

IF2008PCle/IF2008E

Interface card for synchronous data acquisition

Absolute synchronous data acquisition is a decisive factor for the deflection or straightness measurement using several controllers. The IF2008PCle interface card is designed for installation in PCs and enables the synchronous acquisition of four digital sensor signals and two encoders. The data is stored in a FIFO memory in order to enable resource-saving processing in blocks in the PC. The IF2008E expansion board enables to detect in addition two digital controller signals, two analog controller signals and eight I/O signals.

Special features

- IF2008PCle - Basic printed circuit board: 4 digital signals and 2 encoders
- IF2008E - Expansion board: 2x digital signals, 2x analog signals and 8x I/O signals

IF2035

Interface module for Industrial Ethernet connection

The IF2035 interface modules are designed for easy connection of Micro-Epsilon sensors to Ethernet-based fieldbuses. The IF2035 is compatible with sensors that output data via an RS422 or RS485 interface and supports the common Industrial Ethernet protocols EtherCAT, PROFINET and EtherNet/IP.

These modules operate on the sensor side with up to 4 MBd and have two network connections for different network topologies. In addition, the IF2035-EtherCAT offers a 4-fold oversampling function, which enables faster measurements than the bus cycle allows, if required. Installation in control cabinets is via a DIN rail.

Sensors and Systems from Micro-Epsilon

Sensors and systems for displacement, distance and position

Sensors and measurement devices for non-contact temperature measurement

Measuring and inspection systems for metal strips, plastics and rubber

Optical micrometers and fiber optics, measuring and test amplifiers

Color recognition sensors, LED analyzers and inline color spectrometers

3D measurement technology for dimensional testing and surface inspection
